

Beyond Method provides a forum for scholars across health and human sciences disciplines to explore issues surrounding philosophy, methodology, and epistemology in the context of interpretive scholarship. The essays comprising this volume move beyond the practical descriptions or the how to of interpretive methods commonly found in textbooks to explore the contributions, underlying assumptions, limitations, and possibilities embedded within and across particular philosophical, methodological, and epistemological perspectives. They reveal the complexity and richness of understanding that emerges when philosophical issues are explicated within contemporary contexts, illuminating new possibilities for healthcare and human science scholarship.
