

Greenprint features over 150 pages of innovations in the built environment from all around the world, showing how sustainability can change your world from the smallest to the biggest scale. The richly illustrated book contains a wealth of information for anyone working on sustainable urban environments and architecture, ranging from energy & materials to transportation, waste, agriculture, social interventions, neighborhoods and existing eco-cities. Did you know there were streetlights which react to moonlight? What algae production can do in your city? How to help solve social youth issues in your neighborhood, or what phase-change materials can do to save energy? All those, and 70 more examples bring sustainability to life. And last but not least: this book is creative commons: you may copy its pages and give them to your friends, or use them as a reference for your own personal projects.
