

The Everyone's Guide Series explores modern astronomy, physics, and cosmology, making the frontiers of science accessible to all. With short books focused on specific topics, readers can easily mix and match, satisfying their individual interests. Each self-contained book tells its own story. The Series may be read in any order or combination. This book tells the story of our universe and how humanity fits into the grand cosmic scheme. Einstein said: The most incomprehensible thing about our universe is that it is comprehensible. We humans claim to understand what lies beyond the most distant stars, what happened billions of years ago, and what will happen in the remote future. We will explore the most important things that science has discovered about our universe. Then we will examine the remarkable way in which humanity fits into the grand scheme of existence.

? ??????????, Hitler's Wave-Breaker Concept: An Analysis of the German End Game in the Baltic, The People of China and Their Food (Multicultural Cookbooks), Shining Eyes, Cruel Fortune: The Lives and Loves of Italian Renaissance Women Poets, Community and Social Change in America (Clarke A. Sanford-Armand G. Erpf lecture series on local government and community life), Les Français en Russie; souvenirs de la Campagne de 1812, et de deux ans de captivité en Russie.
